Overview

The Federal IT Security Conference (FITSC) is organized by the Federal IT Security Institute (FITSI) and Phoenix TS and will take place in Columbia, MD on November 8th, 2016. Speakers from NIST, DHS, the Defense Department as well as private industry will be in attendance discussing the themes and trends that are influencing the Federal/DoD cyber landscape. The conference is currently accepting applications for speaking opportunities. The conference is broken into three main tracks: Management, Technical and Operational. Applications for speaking should map into one of these tracks.

Topics of Interest

- Continuous Monitoring
- Endpoint Protection
- Configuration Settings Management
- OMB Cybersecurity Policy
- NIST Cybersecurity Guidance
- Cyber Command
- Methodologies
- Insider Threat Mitigation
- Vulnerability Management
- Incident Management Best Practices
- Security Engineering
- DHS Operational Best Practices
- NIST Cybersecurity Framework Processes

Format

Sessions can be in either of the following two formats:

- ◆ Speaker
- ◆ Panel (with Moderator and Panelists)
